Sommario/riassunto	Education faces its own credibility crunch as overschooling combines with undereducation to leave young people overqualified and underemployed. This book reveals what has gone wrong in schools, colleges and universities and how this relates to the changing relationship between young people, educational qualifications and employment in the early 21st century. Combining their experience across sectors, the authors present a comprehensive review of education and training from primary to postgraduate schools. Meeting the crisis in policy and theory, they suggest new pedagogical principles are need

Sommario/riassunto	Are you maximizing the processing power in your multi-core computer systems? With this resource, you discover how to do exactly that, while gaining insight into concurrent programming with tasks to create professional parallel applications using C# 4, .Net 4, and Visual Studio 2010. You learn other parallel programming techniques, including modern single instruction, multiple data instructions and vectorization. Plus, you explore the possibilities offered by modern parallel libraries and advanced Intel tools with C#. Use the new lightweight coordination structures to tackle the most complex concurrent programming problems and develop your own customized solutions. --Book Jacket.
