

1. Record Nr.	UNINA9910791574503321
Titolo	Demography and the economy [[electronic resource] /] / edited by John B. Shoven
Pubbl/distr/stampa	Chicago ; ; London, : University of Chicago Press, 2011
ISBN	1-283-05856-1 9786613058560 0-226-75475-8
Descrizione fisica	1 online resource (444 p.)
Collana	National Bureau of Economic Research conference report
Altri autori (Persone)	ShovenJohn B
Disciplina	330
Soggetti	Demography - Economic aspects Fertility, Human - Economic aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	The future of American fertility / Samuel H. Preston and Caroline Sten Hartnett -- Comment: Gopi Shah Goda -- Fertility theories: can they explain the negative fertility-income relationship? / Larry E. Jones, Alice Schoonbroodt and Michele Tertilt -- Comment: Amalia R. Miller -- Women's education and family behavior: trends in marriage, divorce and fertility / Adam Isen and Betsey Stevenson -- Comment: Enrico Moretti -- Adjusting government policies for age inflation / John B. Shoven and Gopi Shah Goda -- Comment: Warren C. Sanderson -- Old Europe ages: reforms and reform backlashes / Axel Borsch-Supan and Alexander Ludwig -- Comment: Alan J. Auerbach -- The final inequality: variance in age at death / Shripad Tuljapurkar -- Comment: Victor R. Fuchs -- Demographic trends, housing equity, and the financial security of future retirees / James M. Poterba, Steven F. Venti and David A. Wise -- Comment: Thomas Davidoff -- Aging populations, pension operations, potential economic disappointment and its allocation / Sylvester J. Schieber -- Comment: Steven F. Venti -- Financing Medicare: a general equilibrium analysis / Orazio Attanasio, Sagiri Kitao and Giovanni L. Violante -- Comment: Moshe Buchinsky -- Italians are late: does it matter? / Francesco C. Billari and Guido Tabellini -- Comment: Luigi Pistaferri.

Demographics is a vital field of study for understanding social and economic change and it has attracted attention in recent years as concerns have grown over the aging populations of developed nations. Demographic studies help make sense of key aspects of the economy, offering insight into trends in fertility, mortality, immigration, and labor force participation, as well as age, gender, and race specific trends in health and disability. *Demography and the Economy* explores the connections between demography and economics, paying special attention to what demographic trends can reveal about the sustainability of traditional social security programs and the larger implications for economic growth. The volume brings together some of the leading scholars working at the border between the two disciplines, and it provides an eclectic overview of both fields. Contributors also offer deeper analysis of a variety of issues such as the impact of greater wealth on choices about marriage and childbearing and the effects of aging populations on housing prices, Social Security, and Medicare.
