Sommario/riassunto	High levels of child malnutrition in developing countries contribute to mortality and have long-term consequences for children's cognitive development and earnings as adults. Recent impact evaluations show that many different interventions have had an impact on children's anthropometric outcomes (height, weight, and birth weight), but there is no simple answer to the question "What works?" to address the problem. Similar interventions have widely different results in different settings, owing to differences in local context, the causes and severity of malnutrition, and the capacity for program

Sommario/riassunto	Joy H. Calico examines the cultural history of postwar Europe through the lens of the performance and reception of Arnold Schoenberg's A Survivor from Warsaw-a short but powerful work, she argues, capable of irritating every exposed nerve in postwar Europe. Schoenberg, a Jewish composer whose oeuvre had been one of the Nazis' prime exemplars of entartete (degenerate) music, immigrated to the United States and became an American citizen. Both admired and reviled as a pioneer of dodecaphony, he wrote this twelve-tone piece about the Holocaust in three languages for an American audience. This book investigates the meanings attached to the work as it circulated through Europe during the early Cold War in a kind of symbolic musical remigration, focusing on six case studies: West Germany, Austria, Norway, East Germany, Poland, and Czechoslovakia. Each case is unique, informed by individual geopolitical concerns, but this analysis also reveals common themes in anxieties about musical modernism,
