|-------------------------|--|
| 1. Record Nr. | UNINA9910791757503321 |
| Autore | Kirkham M. B. |
| Titolo | Elevated carbon dioxide : impacts on soil and plant water relations / / M.B. Kirkham |
| Pubbl/distr/stampa | Boca Raton, Fla. : , : CRC Press, , 2011 |
| ISBN | 0-429-10774-9 1-4398-5505-6 |
| Descrizione fisica | 1 online resource (406 p.) |
| Disciplina | 632/.19 |
| Soggetti | Plants - Effect of atmospheric carbon dioxide on Plant-water relationships Plant-soil relationships Growth (Plants) |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Front Cover; Contents; Preface; Chapter 1: Elevated Atmospheric Carbon Dioxide: Drought; Chapter 2: Elevated Carbon Dioxide in the Soil: Composition of the Soil Atmosphere; Chapter 3: Elevated Carbon Dioxide in the Soil: Interaction with the Soil Physical Factors That Affect Root Growth; Chapter 4: Elevated Carbon Dioxide in the Soil: Variable Oxygen Concentration and Root Growth; Chapter 5: Elevated Carbon Dioxide in the Atmosphere: Interaction with the Soil Physical Factors That Affect Root Growth; Chapter 6: Elevated Atmospheric Carbon Dioxide: Root Growth Chapter 7: Elevated Atmospheric Carbon Dioxide: Plant Water Potential, Osmotic Potential, and Turgor Potential Chapter 8: Elevated Atmospheric Carbon Dioxide: Stomatal Conductance; Chapter 9: Elevated Atmospheric Carbon Dioxide: Stomatal Density; Chapter 10: Elevated Atmospheric Carbon Dioxide: Transpiration and Evapotranspiration; Chapter 11: Elevated Atmospheric Carbon Dioxide: Water Use Efficiency; Chapter 12: Elevated Atmospheric Carbon Dioxide: C3 and C4 Plants; Chapter 13: Elevated Atmospheric Carbon Dioxide: Plant Anatomy; Chapter 14: Elevated Atmospheric Carbon Dioxide: Phenology |

Sommario/riassunto

Between 1958 and 2008, the CO₂ concentration in the atmosphere increased from 316 to 385 ppm. Continued increases in CO₂ concentration will significantly affect long-term climate change, including variations in agricultural yields. Focusing on this critical issue, Elevated Carbon Dioxide: Impacts on Soil and Plant Water Relations presents research conducted on field-grown sorghum, winter wheat, and rangeland plants under elevated CO₂. It describes specific results from pioneering experiments performed over a seven-year period in the Evapotra
