

1. Record Nr.	UNINA9910791776703321
Titolo	Challenges and opportunities in using residual newborn screening samples for translational research [[electronic resource] ] : workshop summary // Steve Olson and Adam C. Berger, rapporteurs ; Roundtable on Translating Genomic-Based Research for Health, Board on Health Sciences Policy, Institute of Medicine of the National Academies
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, 2010
ISBN	0-309-17713-8 1-282-91713-7 9786612917134 0-309-15955-5
Descrizione fisica	1 online resource (85 p.)
Altri autori (Persone)	OlsonSteve <1956-> BergerAdam C
Disciplina	618.9
Soggetti	Genetic disorders - Diagnosis Newborn infants - Diseases - Diagnosis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Front Matter""; ""Reviewers""; ""Acknowledgments""; ""Contents""; ""Abbreviations and Acronyms""; ""1 Introduction""; ""2 Newborn Screening as a Public Health Program""; ""3 Uses of Residual Newborn Screening Samples in Research""; ""4 Concerns About the Use of Residual Newborn Screening Samples""; ""5 Review and Consent in the Use of Residual Newborn Screening Samples""; ""6 Parental and Public Education""; ""7 Workshop Overview and Wrap-Up""; ""References""; ""Appendix A: Workshop Agenda""; ""Appendix B: Speaker Biographical Sketches""
Sommario/riassunto	"Newborn screening samples are used to test more than 4 million infants each year for life-threatening diseases that are treatable if found at birth. These specimens also represent a potentially invaluable resource for public health and biomedical research. The IOM held a workshop to examine issues surrounding the use of residual specimens for translational research."
