

1. Record Nr.	UNINA9910791933703321
Autore	Shatkay Hagit
Titolo	Mining the biomedical literature // Hagit Shatkay and Mark Craven
Pubbl/distr/stampa	Cambridge, Mass., : MIT Press, ©2012
ISBN	1-283-55006-7 9786613862518 0-262-30516-X
Descrizione fisica	1 PDF (150 pages)
Collana	Computational molecular biology
Altri autori (Persone)	CravenMark
Disciplina	610.285
Soggetti	Medical literature - Data processing Biological literature - Data processing Data mining Medical informatics Bioinformatics Information storage and retrieval systems - Medicine Information storage and retrieval systems - Biology Content analysis (Communication) Information retrieval
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Fundamental Concepts in Biomedical Text Analysis -- Information Retrieval -- Information Extraction -- Evaluation -- Putting it All Together : Current Applications and Future Directions.
Sommario/riassunto	A concise introduction to fundamental methods for finding and extracting relevant information from the ever-increasing amounts of biomedical text available.
