

1. Record Nr.	UNINA9910791968403321
Autore	Hindman Neil <1943->
Titolo	Algebra in the Stone-Cech compactification [[electronic resource]] : theory and applications / / Neil Hindman, Donna Strauss
Pubbl/distr/stampa	Berlin ; ; Boston, : De Gruyter, 2012
ISBN	3-11-025835-8
Edizione	[2nd rev. and extended ed.]
Descrizione fisica	1 online resource (609 p.)
Collana	De Gruyter textbook
Classificazione	SK 340
Altri autori (Persone)	StraussDona <1934->
Disciplina	514/.32
Soggetti	Stone-Cech compactification Topological semigroups
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Background development -- pt. 2. Algebra of $[\beta]S$ -- pt. 3. Combinatorial applications -- pt. 4. Connections with other structures.
Sommario/riassunto	This is the second revised and extended edition of the successful book on the algebraic structure of the Stone-ech compactification of a discrete semigroup and its combinatorial applications, primarily in the field known as Ramsey Theory. There has been very active research in the subject dealt with by the book in the 12 years which is now included in this edition. This book is a self-contained exposition of the theory of compact right semigroups for discrete semigroups and the algebraic properties of these objects. The methods applied in the book constitute a mosaic of infinite combinatorics, algebra, and topology. The reader will find numerous combinatorial applications of the theory, including the central sets theorem, partition regularity of matrices, multidimensional Ramsey theory, and many more.
