Sommario/riassunto	Allan McNicol examines the longstanding tension between the author of Revelation's description of the destruction of unrepentant nations early in the book in contrast with their final experience of salvation in Rev 21.24-26. McNicol examines how the author of Revelation interprets and re-fashions both scripture and the myths of the age in order to lay out his vision of redemption - leading to his ultimate conclusion that human political power (Rome) will crumble before the influence of the crucified Jesus. Through careful attention to references to the 'pilgrimage to the Gentiles' in prophetic

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	This book applies Owen's unique genetic-social framework to the study of crime and criminal behaviour, with an emphasis on cybercrime. Moving beyond challenges which confront contemporary criminological theorizing such as: the stagnation of critical criminology, the relativistic nihilism of the 'cultural turn', posthumanism, and virtual criminology, the author codifies and 'applies' the latest version of the framework to the study of crime, both in and out of cyberspace. Drawing upon evolutionary psychology, behavioural genetics and the philosophy of Heidegger, he introduces new terms such as 'Neuro-Agency' and notions of Embodied Cognition into criminological theorizing. Adopting a soft compatibilist approach to free-will, and Realist ontology, Owen's meta-theoretical focus provides a new direction for criminological

theorizing, in particular in the direction of the conceptualization and prediction of cyber violence. Exciting and timely, this book will appeal to scholars and advanced students of criminology, law, sociology, social policy, psychology, philosophy, policing and forensic investigation.
