Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Social topology -- The structures of physical space -- The dialectic of social space and physical space -- Creative destruction in the urban core -- Deconstructionist architecture and social reproduction.
Sommario/riassunto	This is the first work to explicitly target Bourdieu's philosophy of space as a basic organizing force for his social theory. It draws together his work on both social space and physical space, and it applies the logic that binds them together to problems of architecture and urban development.
