Sommario/riassunto

This book examines the need for greater East Asian cooperation and the challenges to this grand endeavor. With differing national outlooks, how can East Asia preserve peace, prosperity and stability amidst geopolitical competition? To answer this question, the volume examines the political and economic relations between Beijing and its neighbors against the backdrop of two trends: the power shift from the West to the East in the aftermath of the American Financial Crisis and the ongoing eurozone crisis, as well as the rise of China.
