Sommario/riassunto

This publication contains the six main appendices to the PhD thesis "'A Living Landscape: Bronze Age settlement sites in the Dutch river area (c. 2000-800 BC)'" by Stijn Arnoldussen which was published by Sidestone Press in 2008. That study comprises an analysis of the nature (i.e. the constituent components) and dynamics (i.e. diachronic approaches to settlement dynamics) of the settlement sites. It aims to integrate and synthesize interpretations of Bronze Age settlements based on a number of large-scale excavations. The discussion of the archaeological and geological research on these sites
