The impact of the financial crisis on<br>PROPER Current status of proper (2001-2011) Summary and<br>conclusions.  |
| Sommario/riassunto      | This book is a remarkable case study of an environmental policy<br>initiative for a national environmental regulatory system in the<br>information age. In 1995 the Indonesian Ministry of Environment took<br>the bold step to launch an environmental disclosure initiative called the<br>Program for Pollution Control, Evaluation and Rating (PROPER). Under<br>PROPER, environmental performance of companies is mapped into a<br>five-color grading scale - Gold for excellent, Green for very good, Blue<br>for good, Red for non-compliance, and Black for causing environmental<br>damage. These ratings are then publicly disclosed |
