Sommario/riassunto	The official publication of the Society for Vascular Nursing, the newly

updated Core Curriculum for Vascular Nursing provides core vascular nursing information essential to new and experienced practitioners alike. Presented in a quick-reference outline, the evidence-based content addresses a wide range of vascular conditions, as well as diagnostics, vascular anatomy, surgical interventions, medications, and patient education. Whether you are prepping for the certification exam, involved in continuing education, or treating a challenging patient condition, this is an unbeatable resource.
