Sommario/riassunto	At the height of the Cold War, the U.S. government enlisted the aid of a select group of psychologists, sociologists, and political scientists to blueprint enemy behavior. Not only did these academics bring sophisticated concepts to what became a project of demonizing communist societies, but they influenced decision-making in the map rooms, prison camps, and battlefields of the Korean War and in Vietnam. With verve and insight, Ron Robin tells the intriguing story of the rise of behavioral scientists in government and how their potentially dangerous, "American" assumptions about human behavior would

shape U.S. views of domestic disturbances and insurgencies in Third World countries for decades to come. Based at government-funded think tanks, the experts devised provocative solutions for key Cold War dilemmas, including psychological warfare projects, negotiation strategies during the Korean armistice, and morale studies in the Vietnam era. Robin examines factors that shaped the scientists' thinking and explores their psycho-cultural and rational choice explanations for enemy behavior. He reveals how the academics' intolerance for complexity ultimately reduced the nation's adversaries to borderline psychotics, ignored revolutionary social shifts in post-World War II Asia, and promoted the notion of a maniacal threat facing the United States. Putting the issue of scientific validity aside, Robin presents the first extensive analysis of the intellectual underpinnings of Cold War behavioral sciences in a book that will be indispensable reading for anyone interested in the era and its legacy.

Nota di contenuto	Frontmatter -- Contents -- List of Figures, Maps, and Tables -- Acknowledgments -- Introduction -- 1. Welfare and Sectarianism in Plural Societies -- 2. Political Sectarianism and the Residual Welfare Regime in Lebanon -- 3. Political Mobilization Strategies and In-Group Competition among Sectarian Parties -- 4. The Political Geography of Welfare and Sectarianism -- 5. Political Loyalty and Access to Welfare -- 6. Sectarian Parties and Distributional Politics -- 7. Welfare and Identity Politics beyond Lebanon -- Conclusion: The Consequences of Welfare Provision by Identity-Based Organizations -- Notes -- References -- Index
Sommario/riassunto	In Lebanon, religious parties such as Hezbollah play a critical role in providing health care, food, poverty relief, and other social welfare services alongside or in the absence of government efforts. Some parties distribute goods and services broadly, even to members of other parties or other faiths, while others allocate services more narrowly to their own base. In <i>Compassionate Communalism</i> , Melani Cammett analyzes the political logics of sectarianism through the lens of social welfare. On the basis of years of research into the varying

welfare distribution strategies of Christian, Shia Muslim, and Sunni Muslim political parties in Lebanon, Cammett shows how and why sectarian groups deploy welfare benefits for such varied goals as attracting marginal voters, solidifying intraconfessional support, mobilizing mass support, and supporting militia fighters. Cammett then extends her arguments with novel evidence from the Sadrists movement in post-Saddam Iraq and the Bharatiya Janata Party in contemporary India, other places where religious and ethnic organizations provide welfare as part of their efforts to build political support. Nonstate welfare performs a critical function in the absence of capable state institutions, Cammett finds, but it comes at a price: creating or deepening social divisions, sustaining rival visions of the polity, or introducing new levels of social inequality. *Compassionate Communalism* is informed by Cammett's use of many methods of data collection and analysis, including Geographic Information Systems (GIS) analysis of the location of hospitals and of religious communities; a large national survey of Lebanese citizens regarding access to social welfare; standardized open-ended interviews with representatives from political parties, religious charities, NGOs, and government ministries, as well as local academics and journalists; large-scale proxy interviewing of welfare beneficiaries conducted by trained Lebanese graduate students matched with coreligionist respondents; archival research; and field visits to schools, hospitals, clinics, and other social assistance programs as well as political party offices throughout the country.
