Sommario/riassunto

Contemporary East Asian societies are still struggling with complex legacies of colonialism, war and domination. Years of Japanese imperial occupation followed by the Cold War have entrenched competing historical understandings of responsibility for past crimes in Korea, China, Japan and elsewhere in the region. In this context, even the impressive economic and cultural networks that have developed over the past sixty years have failed to secure peaceful coexistence and overcome lingering attitudes of distrust and misunderstanding in the region. This book examines the challenge.
