Sommario/riassunto	There is much controversy about the dangers of a free media when it comes to children and adolescents. Many believe that this constitutional right should be amended, altered, or revoked entirely to prevent the young from being negatively influenced. Graphic violence, sexual content, and the depiction of cigarette smoking have all come under fire as being unacceptable in media that is geared toward

adolescents, from television and movies to magazines and advertising. Yet not much has been written about the developmental science behind these ideas, and what effects a free media really has on ado
