

1. Record Nr.	UNINA9910792248403321
Autore	Biaynicki-Birula Iwo
Titolo	Modeling reality [[electronic resource]] : how computers mirror life // Iwo Biaynicki-Birula, Iwona Biaynicka-Birula
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2004
ISBN	1-4356-0969-7 0-19-152399-2 1-280-90304-X
Descrizione fisica	1 online resource (191 p.)
Altri autori (Persone)	Biaynicka-BirulaIwona
Disciplina	530.01 530/.01
Soggetti	Reality Life Physics - Philosophy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [173]-175) and index.
Nota di contenuto	Contents; 1 From building blocks to computers: Models and modeling; 2 The game of life: A legendary cellular automaton; 3 Heads or tails: Probability of an event; 4 Galton's board: Probability and statistics; 5 Twenty questions: Probability and information; 6 Snowflakes: The evolution of dynamical systems; 7 The Lorenz butterfly: Deterministic chaos; 8 From Cantor to Mandelbrot: Self-similarity and fractals; 9 Typing monkeys: Statistical linguistics; 10 The bridges of Konigsberg: Graph theory; 11 Prisoner's dilemma: Game theory; 12 Let the best man win: Genetic algorithms 13 Computers can learn: Neural networks14 Unpredictable individuals: Modeling society; 15 Universal computer: The Turing machine; 16 Hal, R2D2, and Number 5: Artificial intelligence; Epilog; Programs; Further reading; Index; A; B; C; D; E; F; G; H; I; K; L; M; N; O; P; R; S; T; U; V; W; X; Z
Sommario/riassunto	This book is for everyone (college and high-school students, school teachers and the general public) who wants to learn about many fascinating ideas that have come to the fore with recent advances in the application of computers to real life situations. Twenty five computer

programs greatly enhance the pleasure of learning the spellbinding topics covered in the book. - ;The book Modeling Reality covers a wide range of fascinating subjects, accessible to anyone who wants to learn about the use of computer modeling to solve a diverse range of problems, but who does not possess a specialized trai
