Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2005
ISBN	0-19-151586-8 1-280-75800-7
Descrizione fisica	1 online resource (296 p.)
Disciplina	306.3/2/0943409034
Soggetti	Real property - Social aspects - Germany - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Acquisition and transmission -- Transactions -- Boundaries -- Changes.
Sommario/riassunto	This is a study of the uses of property in south-western Germany from 1820 to 1914. Based on extensive documentation from civil court records, the book provides important new insights into the nature of civil society, forms of social conflict, and the application of the law to everyday life. The book's intriguing, sometimes bizarre, and always revealing stories of legal disputes offer an ironic and bemused view of the past human condition. - ;Historians have often employed the concept of civil society, an intermediary realm between the family and the state, to analyse nineteenth-century Europe

2. Record Nr.	UNINA9910438023403321
Autore	Richardson Randy Ray
Titolo	Atlas of pediatric cardiac CTA : congenital heart disease / / Randy Ray Richardson
Pubbl/distr/stampa	New York, : Springer Science, 2013
ISBN	1-4614-0088-0
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (133 p.)
Disciplina	616.92120757
Soggetti	Medicine Pediatric cardiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Advantages of Cardiac CTA over Other Imaging Modalities -- Scanning Technique for Cardiac CTA in Infants and Small Children -- Advanced Post processing of Cardiac CTA -- Systematic Evaluation of Cardiac CTA -- Evaluation of the Atria, Atrioventricular Valves, and Veins -- Evaluation of the Ventricles -- Evaluation of the Great Vessels -- Evaluation of the Coronary Arteries -- Evaluation of the Lungs and Airways -- Evaluation of Situs -- Operations Performed for Patients with Congenital Heart Disease.
Sommario/riassunto	Atlas of Pediatric Cardiac CTA is a concise visual guide to the imaging of congenital heart disease in infants and children. The book focuses on the utilization of cardiac CTA imaging for pediatric patients as distinct from adult patients, with an emphasis on techniques for retrospective and prospective scanning, reduction of the radiation dose, and CT data processing and analysis. It also describes cardiac CTA evaluation search patterns to assess the complex anatomy in congenital heart patients. As pediatric patients often present with multiple findings, separate chapters are devoted to the major structures of the cardiovascular system, accompanied with extensive imaging examples of the atria, ventricles, great vessels, coronary arteries, lungs and airways, and the situs. The book concludes with a review of shunts, procedures, and surgeries used in the management of these congenital disorders. Atlas of Pediatric Cardiac CTA is a valuable resource for radiologists, cardiologists, and other clinicians or

physicians in training involved in the care of pediatric patients with congenital heart disease.
