Sommario/riassunto	The history of Continental philosophy is often conceived as being represented by two major schools: German idealism and phenomenology/existentialism. These two schools are frequently juxtaposed so as to highlight their purported radical differences. There is a commonly held view that an abrupt break occurred in the nineteenth century, resulting in a disdainful rejection of idealism in all its forms. This break is often located in the transition from Hegel to Kierkegaard. The history of philosophy in the first half of the nineteenth century has thus been read as a grand confrontation
