	Sommario/riassunto	In Power Objects in Tibetan Buddhism: The Life, Writings, and Legacy of Sokdokpa Lodrö Gyeltsen , James Duncan Gentry explores how objects of power figure in Tibetan religion, society, and polity through a study of the life of the Tibetan Buddhist ritual specialist Sokdokpa Lodrö Gyeltsen (1552–1624) within the broader context of sixteenth- and seventeenth-century Tibet. In presenting Sokdokpa's career and legacy, Gentry traces the theme of power objects across a wide spectrum of genres to show how Tibetan Buddhists themselves have theorized

about objects of power and implemented them in practice. This study therefore provides a lens into how power objects serve as points of convergence for elite doctrinal discourses, socio-political dynamics, and popular religious practices in Tibetan Buddhist societies.

Sommario/riassunto	The accelerating power of deep learning in diagnosing diseases will empower physicians and speed up decision making in clinical environments. Applications of modern medical instruments and digitalization of medical care have generated enormous amounts of medical images in recent years. In this big data arena, new deep learning methods and computational models for efficient data processing, analysis, and modeling of the generated data are crucially important for clinical applications and understanding the underlying biological process. This book presents and highlights novel algorithms, architectures, techniques, and applications of deep learning for medical image analysis.
