The Dead Homunculus; 7. Serotonin's Seductive Song; 8. A Chesty Problem; 9. Lord Nelson's Ghost; 10. Freudian Slips and Semantic Slides; Notes
Sommario/riassunto	Perminder Sachdev explores the complexity of the human brain through ten fascinating case-studies from the neuropsychiatric clinic. From alien hand syndrome, anorexia nervosa, frontal lobe dysfunction and phantom limb to coprolalia in Tourette's Syndrome, dementia and golfer's cramp, he provides an understanding of how each disorder has been conceptualised and treated and the challenges that it poses for both the neuropsychiatrist and his patient.
