1.	Record Nr.	UNINA9910792483503321
	Autore	Tullis Tom (Thomas)
	Titolo	Measuring the user experience : collecting, analyzing, and presenting usability metrics / / Tom Tullis, Bill Albert
	Pubbl/distr/stampa	Amsterdam, Netherlands, : Elsevier, c2013 Waltham, MA : , : Elsevier, , 2013
	ISBN	0-12-415792-0
	Edizione	[2nd ed.]
	Descrizione fisica	1 online resource (xvii, 301 pages) : color illustrations
	Collana	Gale eBooks
	Disciplina	005.4/37
	Soggetti	User interfaces (Computer systems) - Measurement User interfaces (Computer systems) - Evaluation Technology assessment
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Revised edition of: Measuring the user experience / Tom Tullis, Bill Albert. 2008.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Background -- Planning -- Performance metrics -- Issues based metrics -- Self-reported metrics -- Behavioral and physiological metrics -- Combined and comparative metrics -- Special topics -- Case studies -- Ten keys to success.
	Sommario/riassunto	Measuring the User Experience was the first book that focused on how to quantify the user experience. Now in the second edition, the authors include new material on how recent technologies have made it easier and more effective to collect a broader range of data about the user experience. As more UX and web professionals need to justify their design decisions with solid, reliable data, Measuring the User Experience provides the quantitative analysis training that these professionals need. The second edition presents new metrics such as emotional engagement, personas, keystroke analysis, and net promoter score. It also examines how new technologies coming from neuro-marketing and online market research can refine user experience measurement, helping usability and user experience practitioners make business cases to stakeholders. The book also contains new research and updated examples, including tips on writing online survey questions, six new case studies, and examples using the most recent version of Excel. Learn which metrics to select for every case, including

behavioral, physiological, emotional, aesthetic, gestural, verbal, and physical, as well as more specialized metrics such as eye-tracking and clickstream data Find a vendor-neutral examination of how to measure the user experience with web sites, digital products, and virtually any other type of product or system Discover in-depth global case studies showing how organizations have successfully used metrics and the information they revealed Companion site, www.measuringux.com, includes articles, tools, spreadsheets, presentations, and other resources to help you effectively measure the user experience
