Sommario/riassunto	Laser-Beam Interactions with Materials treats, from a physicist's point of view, the wide variety of processes that lasers can induce in materials. Physical phenomena ranging from optics to shock waves are discussed, as are applications in such diverse fields as semiconductor annealing, hole drilling and fusion plasma production. The approach taken emphasizes the fundamental ideas and their interrelations. The newcomer is given the necessary important background material, while the active research worker finds a critical and comprehensive review of the field.

Sommario/riassunto

Anglo-French Relations in the Twentieth Century is a collection of  
studies on the key episodes of the difficult and often discordant Anglo-  
French exchange over the past century. The authors critically re-  
evaluate: \* the role of Spain in Anglo-French relations up to 1918 \* the  
missed opportunity of the 1920's with the failure of France and Britain  
to find sufficient common ground and co-operation \* the short-lived  
Anglo-French alliance and the Second World War \* the degree of  
Anglo-French Imperial co-operation \* the Suez Crisis \* British and  
French policies on Europe
