Three Puzzles, a Conundrum and a Question: Towards a Dynamic and Problem-Focused Policy Research Agenda; Index

Sommario/riassunto

Market globalization and the globalization of environmental concerns have spurred demand for greater international accountability for forest stewardship. In response, a range of multi-lateral governmental and non-governmental initiatives have emerged to redefine the rules of global trade, and demand verification of the legality and/or sustainability of forest products originating from within and outside national boundaries. At the same time there is a lack of transparency and shared understanding about the environmental forest policies that already exist within the world's leading f
