Livello bibliografico	Monografia
Note generali	Previously issued in print: 2017.
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Editors Stephen Beckerman and Paul Valentine argue that while Amazonian societies certainly have variations on marriage practices, in reality the rules surrounding them are inconsistently followed. Utilizing methods of cultural and social anthropology and pulling together data from several cultures, contributors demonstrate how individual motives and opportunities--including desire, economics, or residence--result in marriage choices that may negotiate, manipulate, or ignore societal rules.
