

1. Record Nr.	UNINA9910792875103321
Titolo	Manual of clinical oncology // editors, Bartosz Chmielowski, MD, PhD, Associate Clinical Professor, Jonsson Comprehensive Cancer Center, Division of Hematology and Oncology, University of California, Los Angeles, Los Angeles, California, Mary Territo, MD, Emeritus Professor of Medicine, Division of Hematology and Oncology, David Geffen School of Medicine, University of California, Los Angeles, Los Angeles, California
Pubbl/distr/stampa	Philadelphia : , : Wolters Kluwer, , [2017] ©2017
ISBN	1-4963-4959-8
Edizione	[8th edition.]
Descrizione fisica	1 online resource (1,092 pages)
Collana	Lippincott Manual
Disciplina	616.99/4
Soggetti	Neoplasms - diagnosis Neoplasms - therapy Medical Oncology - methods Oncology Handbooks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Concise, portable, and packed with essential information, Manual of Clinical Oncology is an indispensable resource for understanding basic science, clinical findings, and available technology as they relate to the diagnosis and management patients with cancer. The practical format provides high-yield content useful for participating in rounds ad making diagnostic and therapeutic decisions at the bedside. Edited by Dr. Bartosz Chmielowski and Dr. Mary Territo, both from UCLA School of Medicine, this eighth edition carries on the tradition of excellence set forth by longtime editor Dr. Dennis Casciato.Key Features: Incorporates recent major achievements in immunotherapies, biologics, and targeted therapies.Features new chapters on the biology of cancer, immunotherapy, and cancer survivorship.Contains numerous diagnostic

and treatment algorithms, as well as content on complications, for assistance with clinical decision making. Includes helpful appendices such as a glossary of cytogenetic nomenclature and combination chemotherapy regimens. Your book purchase includes a complimentary download of the enhanced eBook for iOS, Android, PC & Mac. Take advantage of these practical features that will improve your eBook experience: The ability to download the eBook on multiple devices at one time — providing a seamless reading experience online or offline. Powerful search tools and smart navigation cross-links that allow you to search within this book, or across your entire library of VitalSource eBooks. Multiple viewing options that enable you to scale images and text to any size without losing page clarity as well as responsive design. The ability to highlight text and add notes with one click.

"Now in its eighth edition, this remarkable, concise, and portable manual is packed with essential information that seamlessly integrates basic science and clinical sciences with technological advances as they relate to the diagnosis, prognosis, treatment, and management of a variety of cancer types. The manual is well organized into four major sections: general aspects, solid tumors, hematological malignancies, and complications. Each section contains several chapters written by experts actively engaged in clinical research. While Sections 2 and 3 cover the most common cancers and contain the expected information, it is Section 4 that is quite remarkable, providing useful information on complications ranging from metabolic complications to those from stem cell transplantation, which is uncommon in standard works in this area. A unique selling point of this book is the outline format with bold headings and subheadings that makes it easy to access pertinent information and makes up for the (almost) total lack of figures and illustrations. Amazingly, although this manual is almost 900 pages, it is quite handy and portable. Overall, it is an indispensable resource that should be a part of every oncology library." Weighted Numerical Score: 94 - 4 Stars! Doodys Publishers' Club, March 2018.
