

1. Record Nr.	UNINA9910792906003321
Autore	Kalantzakos Sophia
Titolo	The EU, US and China tackling climate change : an alliance for the anthropocene // Sophia Kalantzakos
Pubbl/distr/stampa	Milton Park, Abingdon, Oxon ; ; New York, NY : , : Routledge/Earthscan, , 2017
ISBN	0-367-17929-6 1-315-29885-6 1-315-29887-2 1-138-23785-X 1-315-29886-4 9781138237858 978-1-315-29887-0 9781315298863
Descrizione fisica	[ix], 170 pages
Collana	Routledge studies in environmental policy
Soggetti	climate change environmental policy government policy international relations international cooperation sustainable development UE/CE Union européenne European Union United States China
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction: EU and China: Alliance for the Anthropocene -- Chapter 1 The US: Still reluctant and unreliable -- Chapter 2 The European Union: A hopeful paradigm -- Chapter 3 China: Lessons from an unsustainable growth model spur change -- Chapter 4 US–China: Rivalry trumps partnership in the Anthropocene -- Chapter 5 What makes EU–China

collaboration a better fit for the Anthropocene -- Chapter 6 Networks of states to spur hope and change.

Sommario/riassunto

"The feeling of optimism that followed the COP 21 Paris Conference on Climate Change requires concrete action and steadfast commitment to a process that raises a number of crucial challenges: technological, political, social, and economic. As climate change worsens, new robust leadership is imperative. The EU, US and China Tackling Climate Change examines why a close collaboration between the EU and China may result in the necessary impetus to solidify a vision and a roadmap for our common future in the Anthropocene. Kalantzakos introduces a novel perspective and narrative on climate action leadership through an analysis of international relations. She argues that a close EU-China collaboration, which does not carry the baggage of an imbedded competition for supremacy, may best help the global community move towards a low carbon future and navigate the new challenges of the Anthropocene. Overall, Kalantzakos demonstrates how Europe and China, already strategic partners, can exercise global leadership in an area of crucial common interest through their web of relations, substantial development aid, and the use of soft power tools throughout the developing world. This book will be of great interest to students and scholars of environmental politics, international relations, climate change and energy law and policy."--Provided by publisher.
