1.	Record Nr.	UNINA9910792927403321
	Titolo	Perspectives on morphological organization data and analyses / / edited by Ferenc Kiefer, James P. Blevins, Huba Bartos
	Pubbl/distr/stampa	Leiden ; ; Boston : , : Brill, , [2017] ©2017
	ISBN	90-04-34293-1
	Descrizione fisica	1 online resource (250 pages) : illustrations
	Collana	Empirical approaches to linguistic theory, , 2210-6243 ; ; volume 10
	Disciplina	415/.9
	Soggetti	Paradigm (Linguistics)
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Selection of papers presented at the 16th International Morphology Meeting held in Budapest, from May 31 through June 3, 2014.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Preliminary Material -- Editors' Introduction / Ferenc Kiefer , James P. Blevins and Huba Bartos -- Polyfunctionality and the Variety of Inflectional Exponence Relations / Gregory Stump -- Verb Morphology and Conjugation Classes in Dunan (Yonaguni) / Thomas Pellard and Masahiro Yamada -- Inflection Classes in Transitional Libyan Arabic (tla) / Noura Ramli -- Person Agreement on Converbs in Udmurt / Ekaterina Georgieva -- Paradigm Leveling: The Decay of Consonant Alternations in Russian / Varvara Magomedova and Natalia Slioussar -- The Zipfian Paradigm Cell Filling Problem / James P. Blevins , Petar Milin and Michael Ramscar -- Paradigm Realization and the Lexicon / Géraldine Walther -- The Possible Role of Entropy in Processing Argument Dependencies in Hungarian / Csaba Pléh , István Fekete and Dániel Varga -- A Functional Theory of Gender Paradigms / Melody Dye , Petar Milin , Richard Futrell and Michael Ramscar -- Index.
	Sommario/riassunto	This volume contains a selection of recent theoretical studies, deriving from presentations at the 16th International Morphology Meeting (Budapest, 2014), on the organization of morphological paradigms, paradigm complexity, and the inflectional marking of morphosyntactic relations, as well as on the application of information theory to the analysis of morphological systems aiming to achieve a clearer understanding of the close relation between notions of 'morphological information' based on 'uncertainty' and 'uncertainty reduction' and the
