

1. Record Nr.	UNINA9910792954503321
Autore	Ganev Dobrin
Titolo	Build applications with Meteor : full stack development / / Dobrin Ganev
Pubbl/distr/stampa	Birmingham : , : Packt, , 2017
Edizione	[1st edition]
Descrizione fisica	1 online resource (381 pages) : illustrations (some color)
Soggetti	Web applications - Programming Application software - Development Web site development JavaScript (Computer program language)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	Build a variety of cross-platform applications with the world's most complete full-stack JavaScript framework - Meteor About This Book Develop a set of real-world applications each exploring different features of Meteor Make your app more appealing by adding reactivity and responsiveness to it Work with the most powerful feature of Meteor - the ?full stack reactivity? - through building real-time applications with many third party libraries Who This Book Is For If you are a developer who is looking forward to taking your application development skills with Meteor to next level by getting your hands-on different projects, this book is for you. What You Will Learn See how Meteor fits in the modern web application development by using its reactive data system Make your front-end behave consistently across environments by implementing a predictable state container with Redux Get familiar with React and overview of Angular 2 Add a map to your application with a real-time geolocation Plugin into Meteor social media APIs like Twitter's streaming and Facebook's Messenger Add search functionality from scratch to your existing app and data Add responsiveness with Bootstrap 4 and Google's Material Design using Less and Sass Distribute your data across machines and data centers by

adding Apache Cassandra to your existing stack. Learn how to scale your microservices with the high performant language neutral framework gRPC. Learn how to query multiple data sources using GraphQL. In Detail This book starts with the basic installation and overview of the main components in Meteor. You'll get hands-on multiple versatile applications covering a wide range of topics from adding a front-end views with the hottest rendering technology React to implementing a microservices oriented architecture. All the code is written with ES6/7 which is the latest significantly improved JavaScript language. We'll also look at real-time data streaming, server to server data exchange, responsive styles on the front-end, full-text search functionality, and integration of many third-party libraries and APIs using npm. By the end of the book, you'll have the skills to quickly prototype and even launch your next app idea in a matter of days. Style and Approach This book takes an easy-to-follow project-based approach. Each project starts with the goal of what you will learn and an overview the technologies used.

Sommario/riassunto	<p>This unique volume critically discusses the works of fifty of the most influential scholars involved in the study of the Holocaust and genocide. Studying each scholar's background and influences, the authors examine the ways in which their major works have been received by critics and supporters, and analyse each thinker's contributions to the field. Key figures discussed range from historians and philosophers, to theologians, anthropologists, art historians and sociologists, including: Hannah Arendt Christopher Browning Primo Levi Raphael Lemkin <</p>
