ISBN	0-8157-2999-5 9780815729983 9780815729990
Descrizione fisica	1 online resource (275 pages) : illustrations
Disciplina	352.4216
Soggetti	Municipal finance Strategic planning Urban economics local authority finances management planning urban economy town planning investment urban area
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"How to leverage existing resources to meet the current and future needs of cities Crumbling streets and bridges. Poorly performing schools and inadequate social services. These are common complaints in cities, which too often struggle just to keep the lights on, much less make the long-term investments necessary for future generations. It doesn't have to be this way. This book by two internationally recognized experts in public finance describes a new way of restoring economic vitality and financial stability to cities, using steps that already have been proven remarkably successful. The key is unlocking social, human, and economic wealth that cities already own but is out

of sight--or "hidden." A focus on existing public wealth helps to shift attention and resources from short-term spending to longer-term investments that can vastly raise the quality of life for many generations of urban residents. A crucial first step is to understand a city's balance sheet--too few cities comprehend how valuable a working tool this can be. With this in hand, taxpayers, politicians, and investors can better recognize the long-term consequences of political decisions and make choices that mobilize real returns rather than rely on more taxes, debt, or austerity. Another hidden asset is real estate. Even poor cities own large swathes of poorly utilized land, or they control underperforming utilities and other commercial assets. Most cities could more than double their investments with smarter use of these commercial assets. Managing the city's assets smartly through the authors' proposed Urban Wealth Funds--at arm's-length from short-term political influence--will enable cities to ramp up much needed infrastructure investments." -- Publisher
