Descrizione fisica	1 online resource (220 pages) : illustrations, maps
Collana	Wyse Series in Social Anthropology ; ; Volume 4
Classificazione	LC 56390
Disciplina	306.4/61095498
Soggetti	Medical anthropology - Bhutan Traditional medicine - Bhutan Traditional medicine - Technological innovation - Bhutan
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The patient multiple : cures, healths and bodies -- Modernizing traditional medicine : a two-option healthcare service -- An ethnography of decision-making -- Alternative practices and the removal of Ja Ne -- Patients and healing materials : relations and dependency -- Conclusion : assembling patient multiples and complementary logics of care.
Sommario/riassunto	"In the Himalayan Kingdom of Bhutan, medical patients engage a variety of healing practices to seek cures for their ailments. Patients use the expanding biomedical network and a growing number of traditional healthcare units, while also seeking alternative practices, such as shamanism and other religious healing, or even more provocative practices. The Patient Multiple delves into this healthcare complexity in the context of patients' daily lives and decision-making processes, showing how these unique mountain cultures are finding new paths to good health among a changing and multifaceted medical topography."
