

1. Record Nr.	UNINA9910643846903321
Titolo	Anterior pituitary secretion and hormonal influences in water metabolism [[electronic resource] /] / general editor for the Ciba Foundation, G.E.W. Wolstenholme ; assisted by Margaret P. Cameron
Pubbl/distr/stampa	London, : J. & A. Churchill, 1952
ISBN	1-280-76832-0 9786613679093 0-470-71879-X 0-470-71616-9
Descrizione fisica	1 online resource (466 p.)
Collana	Ciba Foundation colloquia on endocrinology ; ; v. 4
Altri autori (Persone)	WolstenholmeG. E. W (Gordon Ethelbert Ward) CameronMargaret P
Disciplina	616.4/027
Soggetti	Pituitary gland - Secretions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Proceedings of two colloquia held at the Ciba Foundation: the Colloquium on the Control of the Anterior Pituitary and Reciprocal Relationships between its Secretions and those of Target Organs, held July 9-13, 1951 and the Colloquium on the Effect of Steroids on Local and General Water Distribution, held Jan. 8-10, 1951. Contains only book 1, Anterior pituitary secretion.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. 1. Anatomy, histology and cytology -- pt. 2. Control of secretions of the anterior pituitary -- pt. 3. Growth hormone -- pt. 4. Gonadotrophins -- pt. 5. Thyrotrophic hormone -- pt. 6. Adrenocorticotrophic hormone -- pt. 7. Lactogenic and mammogenic hormones.

2. Record Nr.	UNINA9910792985503321
Titolo	Anti-VEGF use in ophthalmology // editors, Jay S. Duker, Michelle C. Liang. Published/Produced
Pubbl/distr/stampa	Thorofare, New Jersey : , : SLACK, Incorporated, , 2017 ©2017
ISBN	1-63091-323-5 1-63091-322-7
Descrizione fisica	1 online resource (231 pages) : illustrations (some color)
Disciplina	617.7/061
Soggetti	Eye Diseases - drug therapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	<p>"The introduction of anti-vascular endothelial growth factor (VEGF) agents has revolutionized therapy for a host of ocular diseases associated with leakage from normal blood vessels and pathologic blood vessel growth. Anti-VEGF Use in Ophthalmology is an all-inclusive reference designed to provide detailed, up-to-date, and clinically relevant information on the current use of anti-VEGF agents in the treatment of all ocular conditions. Drs. Jay S. Duker and Michelle C. Liang have assembled a prestigious group of contributors who pool their collective expertise in this comprehensive book. Anti-VEGF Use in Ophthalmology is split into two sections with the first providing the history of VEGF and an overview of anti-VEGF agents and different routes of drug delivery, as it is important for eye care providers to be familiar with up-to-date aspects of the medications and indications for use. The second section details the clinical uses of anti-VEGF agents in numerous ocular diseases, from the anterior segment including cornea and glaucoma to uveitis and various retinal and choroidal diseases. Each chapter in this section summarizes the disease process and utilizes high-quality ocular imaging to demonstrate the therapeutic use of the anti-VEGF agents. Anti-VEGF Use in Ophthalmology combines the theory and applications of anti-VEGF agents, making it not only a</p>

great learning tool for beginners but also a useful reference tool for a wide range of eye care professionals including optometrists, residents, comprehensive ophthalmologists, as well as specialists in anterior segment, pediatrics, and vitreoretinal disease"--Provided by publisher.
