Sommario/riassunto	In Genealogy of Obedience Justyna Wodarczyk provides a long overdue look at the history of companion dog training methods in North America since the mid-nineteenth century, when the market of popular training handbooks emerged. Wodarczyk argues that changes in the functions and goals of dog training are entangled in bigger cultural discourses; with a particular focus on how animal training has served as a field for playing out anxieties related to race, class and gender in

North America. By applying a Foucauldian genealogical perspective, the book shows how changes in training methods correlate with shifts in dominant regimes of power. It traces the rise and fall of obedience as a category for conceptualizing relationships with dogs.
