Titolo	Europe's hybrid threats : what kinds of power does the EU need in the 21st century? // edited by Giray Sadik
Pubbl/distr/stampa	Newcastle upon Tyne, England : , : Cambridge Scholars Publishing, , 2017 ©2017
ISBN	1-4438-9184-3
Descrizione fisica	1 online resource (123 p.)
Classificazione	08.16
Disciplina	355.033
Soggetti	Security, International Security, International - Political aspects - European Union countries
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references
Nota di contenuto	Introduction: Hybrid Threats and European Security / Giray Sadk -- War in Ukraine and European Security: Reset, Reverse or Revoke? / Maria Raquel Freire -- Hybrid Threats and Justice and Home Affairs: The Case of Migration Policy / Zeynep Arkan-Tuncel -- The Visible and Invisible Story of the European Migrant Crisis / H��l��ne Cristini and Claudio Lanza -- The Strategic Consequences of Brexit: The Challenges of the Common European Security and Defence Policy in the Post-Brexit Era / Filiz ��oban -- Turkey and the EU: The Challenges of the Middle Eastern Crises / Kvan�� Ulusoy -- Conclusion: In Search of Hybrid Policy Implications / Giray Sadk
Sommario/riassunto	Hybrid threats posed by various combinations of state and non-state actors have presented considerable transnational challenges to EU-members and NATO-allies. This ongoing rise of hybrid threats, ranging from political instability in Eastern Europe and the Middle East to the resulting mass refugee influx and terrorism in the European neighborhood, stress the need to timely discuss important questions about hybrid threats and the venues for effective Euro-Atlantic cooperation, including post-Brexit policy implications. This edited volume presents comprehensive analyses from various experts.

Collana	Frontiers Research Topics
Soggetti	Psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Face perception is a highly evolved visual skills in humans. This complex ability develops across the life-span, steeply rising in infancy, refining across childhood and adolescence, reaching highest levels in adulthood and declining in old age. As such, the development of face perception comprises multiple skills, including sensory (e.g., mechanisms of holistic, configural and featural perception), cognitive (e.g., memory, processing speed, attentional control), and also emotional and social (e.g., reading and interpreting facial expression) domains. Whereas our understanding of specific functional domains involved in face perception is growing, there is further pressing demand for a multidisciplinary approach toward a more integrated view, describing how face perception ability relates to and develops with other domains of sensory and cognitive functioning. In this research topic we bring together a collection of papers that provide a shot of the current state of the art of theorizing and investigating face perception from the perspective of multiple ability domains. We would like to thank all authors for their valuable contributions that advanced our understanding of face and emotion perception across development.</p>
