

1. Record Nr.	UNINA9910793113903321
Autore	Roeder Philip G.
Titolo	National secession : persuasion and violence in independence campaigns // Philip G. Roeder
Pubbl/distr/stampa	Ithaca ; ; London : , : Cornell University Press, , 2018
ISBN	1-5017-2599-8
Descrizione fisica	1 online resource (1 online resource.)
Collana	Cornell scholarship online
Disciplina	320.1/5
Soggetti	Secession Separatist movements Autonomy and independence movements Political violence Self-determination, National
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previously issued in print: 2018.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Three questions about national secession -- Strategic constraints : goals and means -- Organization and mobilization in campaign development -- Programmatic coordination in campaigns -- Significant campaigns : getting on the global agenda -- Intractable disputes : consequences of successful campaigning -- Protracted intense struggles : reinforcing intractability -- Complementary explanations : motivations and opportunities -- Looking forward : implications of programmatic analysis.
Sommario/riassunto	How do some national-secessionist campaigns get on the global agenda whereas others do not? Which projects for new nation-states, Philip Roeder asks, give rise to mayhem in the politics of existing states? National secession has been explained by reference to identities, grievances, greed, and opportunities. With the strategic constraints most national-secession campaigns face, the author argues, the essential element is the campaign's ability to coordinate expectations within a population on a common goal--so that independence looks like the only viable option. Roeder shows how in most well-known national-secession campaigns, this strategy of programmatic coordination has led breakaway leaders to assume the

critical task of propagating an authentic and realistic nation-state project. Such campaigns are most likely to draw attention in the capitals of the great powers that control admission to the international community, to bring the campaigns' disputes with their central governments to deadlock, and to engage in protracted, intense struggles to convince the international community that independence is the only viable option. In National Secession, Roeder focuses on the goals of national-secession campaigns as a key determinant of strategy, operational objectives, and tactics. He shifts the focus in the study of secessionist civil wars from tactics (such as violence) to the larger substantive disputes within which these tactics are chosen, and he analyzes the consequences of programmatic coordination for getting on the global agenda. All of which, he argues, can give rise to intractable disputes and violent conflicts.

2. Record Nr.	UNINA9910781185103321
Titolo	Integrative oncology [[electronic resource] /] / edited by Donald I. Abrams, Andrew T. Weil

Sommario/riassunto

People facing a new diagnosis of cancer are unsettled by their prognosis and treatment options, and they often seek to integrate complementary modalities into their conventional care plan, hoping to improve their chances of cure and decrease side effects. Many do so without informing their oncologist, for fear of alienating them or not convinced that their physician would be informed about complementary therapies. Integrative Oncology, the first volume in the Weil Integrative Medicine Library, provides a wealth of information for both practitioners and consumers on the emerging field of integr
