

1. Record Nr.	UNINA9910793179903321
Autore	Amram Alec L
Titolo	Clinical Pathways in Neuro-Ophthalmology : An Evidence-Based Approach // by: Smith, Stacy V., Lee, Andrew G., Brazis, Paul W.
Pubbl/distr/stampa	New York : , : Thieme Medical Publisher, , 2018, ©2019
ISBN	1-63853-359-8 1-62623-286-5
Edizione	[Third Edition.]
Descrizione fisica	1 online resource (xvi, 300 pages) : illustrations
Collana	Thieme clinical collection MedOne Neurosurgery
Disciplina	617.7
Soggetti	Neuroophthalmology Medical protocols Evidence-based medicine Optic Nerve Diseases Evidence-Based Medicine Neurology Ophthalmology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Revision of: Clinical Pathways in Neuro-Ophthalmology / Andrew G. Lee, Paul W. Brazis. ©2003. 2nd edition.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The Diagnosis of Optic Neuropathies -- Optic Neuritis -- Optic Disc Edema with a Macular Star and Neuroretinitis -- Nonarteritic Ischemic Optic Neuropathy -- Arteritic Anterior Ischemic Optic Neuropathy and Giant Cell Arteritis -- Traumatic Optic Neuropathy -- Papilledema -- Transient Vision Loss -- Visual Field Defects -- Diplopia -- Third Nerve Palsies -- Fourth Nerve Palsies -- Sixth Nerve Palsies -- Supranuclear Disorders of Gaze -- Ocular Myasthenia Gravis -- Thyroid Eye Disease: Graves Ophthalmopathy -- Nystagmus and Other Ocular Oscillations -- Ptosis -- Lid Retraction and Lid Lag -- Anisocoria and Pupillary Abnormalities -- Index
Sommario/riassunto	The authors share significant clinical pearls and knowledge throughout 20 chapters. The book lays a solid foundation on the management of neurologic eye disorders including symptoms, ophthalmologic testing, diagnosis, and treatment. Among the discussed disorders are anterior

and retrobulbar optic neuropathies, disorders of ocular motility and alignment, lid abnormalities, and anisocoria. Insights are provided on key topics including the use of office examinations, laboratory tests, and neuroimaging studies to make an ophthalmologic diagnosis; and ophthalmologic therapy to treat eye movement disorders such as nystagmus. The evaluation and treatment of various neuro-ophthalmologic processes, stratified by four classes of evidence and four levels of clinical recommendation. -- Publisher
