

1. Record Nr.	UNINA9910793273003321
Autore	Habu Junko <1959->
Titolo	Subsistence-settlement systems and intersite variability in the Moroiso phase of the early Jomon period of Japan / / by Junko Habu
Pubbl/distr/stampa	Ann Arbor, Michigan : , : International Monographs in Prehistory, , 2001
ISBN	1-78920-170-5
Descrizione fisica	1 online resource (xii, 207 pages) : illustrations, maps
Collana	Archaeological series ; ; 14
Disciplina	306.3/64/0952
Soggetti	Hunting and gathering societies - Japan Jomon culture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Theoretical approach -- Background to the study : the Jomon period -- Problems, hypotheses, materials, and methods -- Subsistence-settlement systems of the Moroiso phase -- Changes in subsistence-settlement systems through the Moroiso phase -- Discussion and conclusions.
Sommario/riassunto	This book examines the settlement patterns and intersite variability in lithic assemblages of Early Jomon (ca. 5000 BP) hunter-gatherers in Japan. A model is proposed that links regional settlement patterns and intersite lithic assemblage variability to residential mobility. The results of this study suggest that the Early Jomon people were not sedentary, as previously assumed, but instead moved their residential basis seasonally. The implications of this result are discussed in the context of the development of hunter-gatherer cultural complexity in general and the course of Japanese prehistory in particular.
