

1. Record Nr.	UNINA9910793337203321
Titolo	Pediatric thoracic imaging // editors, Edward Y. Lee [and five others]
Pubbl/distr/stampa	Philadelphia, Pennsylvania : , : Wolters Kluwer, , [2019] ©2019
ISBN	1-4963-5625-X
Descrizione fisica	1 online resource (viii, 356 pages)
Disciplina	618.922
Soggetti	Pediatric respiratory diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"In the past few decades, substantial technological advancements have established imaging as an integral component and invaluable tool for the noninvasive evaluation of a variety of thoracic disorders in infants and children. With the rapidly evolving technology, updated knowledge of imaging techniques and findings that are unique to the pediatric population is increasingly essential for providing optimal patient care. To this end, this book aims to provide a current and comprehensive imaging review of pediatric thoracic disorders that are encountered in daily clinical practice"--Provided by publisher.
