Callen; Going early, going late: the rationality of decisions about suicide in AIDS, Margaret P. Battin; Name index.

Sommario/riassunto

This volume features a collection of the most important articles on the social, ethical and legal implications of a variety of problems caused by AIDS. The wide range of articles selected for inclusion were chosen on the basis of three criteria: their theoretical depth and coherence, their impact on the subsequent debate and on the social and ethical relevance of the problems addressed. Sections in the book include: physicians and patients, AIDS and the law, HIV testing, clinical research in developed countries, clinical research in developing countries and dying with dignity
