

1. Record Nr.	UNINA9910793456503321
Titolo	Immunology : an introductory textbook / / edited by Anil K. Sharma
Pubbl/distr/stampa	Singapore : , : Pan Stanford Publishing, , 2019
ISBN	1-351-36694-7 1-351-36695-5 1-315-15063-8
Descrizione fisica	1 online resource (261 pages)
Disciplina	616.079072
Soggetti	Immunology - Research Immunology - Technique
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover; Half Title; Title Page; Copyright Page; Table of Contents; Preface; 1: Introduction to Immunology; 1.1 Historical Attributes; 1.2 Immunological Responses and Effectors; 1.2.1 Innate and Adaptive Immunity; 1.2.1.1 Innate immunity; 1.2.1.2 Adaptive immunity; 1.3 Summary; 2: Immunity; 2.1 Basic Concept of Immunity; 2.2 Historical Background of Immune Responses; 2.3 Cell-Mediated Immune Responses; 2.4 Processing of Endogenous Antigens: Cytosolic Pathway; 2.5 Processing of Endogenous Antigens: Endocytic Pathway; 2.6 Humoral Immunity; 2.7 Activation of B-Cells 2.8 Humoral Response to T-Dependent Antigens 2.9 Humoral Response to T-Independent Antigens; 3: Proteins of the Immune System; 3.1 Antimicrobial Peptide; 3.2 Pattern Recognition Receptor; 3.3 Toll-Like Receptors; 3.4 NOD Protein; 3.5 Acute Phase Proteins; 3.6 Interferon; 3.7 Complement System; 3.7.1 Function of Complement System; 3.7.2 Complement Nomenclature; 3.8 Activation of Complement Pathways; 3.9 Classical Pathway of the Complement System; 3.10 Lectin Pathway; 3.11 Alternative Pathway; 3.12 Small Fragments of the Complement Protein Initiates Local Inflammatory Response 3.13 Membrane Attack Complex (MAC) or Lytic Pathway 3.14 Regulation of Complement Protein; 3.15 Summary; 4: Major Histocompatibility Complex (MHC): Recent Trends and Relevance from Immunological

Perspective; 4.1 Introduction; 4.2 Nomenclature of HLA Antigens; 4.3 Frequency of Different HLA Alleles; 4.4 Molecular and Genetics Basis of MHC Polymorphisms; 4.4.1 Inheritance; 4.4.2 Expression; 4.5 MHC Molecules: Structure and Genetics; 4.5.1 MHC Class I vs. MHC Class II; 4.5.1.1 MHC Class I; 4.5.1.2 MHC Class II; 4.6 Role of MHC in Immune Response; 4.6.1 The Mixed Lymphocyte Reaction
4.6.2 Antigen Processing and Presentation
4.6.3 Some Points about MHC Class I and Class II /TCR; 4.7 Antigen Processing and Presentation; 4.8 Langerhans Cells as APC; 4.9 Antigen Processing and Presentation by Class II (Exogenous/Endocytic) Pathway; 4.10 Antigen Processing and Presentation by Class I (Endogenous/Cytosolic) Pathway; 4.11 Significance of MHC-Peptide Presentation; 4.12 Clonal Selection of T-cells; 4.13 Generation of Cytotoxic T-Cells; 4.14 Immune Response Genes; 4.15 Complement Factor Genes; 4.16 Nonimmunologic Functions of MHC Genes
4.17 Disease and the Major Histocompatibility Complex
5: Immune System of the Brain; 5.1 Introduction; 5.2 Microglia; 5.3 Astrocytes; 5.4 Toll-Like Receptors; 5.5 Pro-Inflammatory Cytokines; 5.6 Summary; 6: An Overview of Immunodeficiency Disorders; 6.1 Introduction; 6.2 Primary Immunodeficiency Diseases; 6.3 Classification of Primary Immunodeficiency; 6.3.1 Severe Combined Immunodeficiency; 6.3.1.1 X-linked recessive severe combined immunodeficiency; 6.3.1.2 Adenosine deaminase deficiency; 6.3.2 Well-Defined Syndromes with Immunodeficiency

Sommario/riassunto

Immunology has emerged as a key component of the curricula of graduate and postgraduate courses in biotechnology, microbiology, biochemistry, bioinformatics, and other interdisciplinary fields of biology, including zoology, veterinary science, and medicine. As a basic introductory textbook on one of the fastest-moving and most challenging areas of immunological science, this book contains the most recent information about immunologic mechanisms and their importance, along with various molecular techniques employed in immunology. The short and concise text helps make the structures, processes, and interactions of the immune system easily comprehensible. The book includes chapters on immunoinformatics as well as the immune system of the brain, rarely found in any of the immunology books published so far. Many diverse and interesting aspects of the advances in immunology have also been covered, including tumor immunology and immunodeficiency disorders. The easy-to-understand concepts presented in the textbook make it an ideal companion for learners preparing for competitive and other examinations. Undergraduate, postgraduate, and PhD students, people from the industry and academia, and research scholars will immensely benefit from it.
