Titolo	The circular economy and the global south : sustainable lifestyles and green industrial development // edited by Patrick Schroder, Manisha Anantharaman, Kartika Anggraeni and Tim Foxon
Pubbl/distr/stampa	New York, NY : , : Routledge, , 2019
ISBN	0-429-78369-8 0-429-43400-6 0-429-78368-X
Descrizione fisica	1 online resource (239 pages)
Collana	Pathways to sustainability series
Disciplina	338.9/27091724
Soggetti	Sustainable development - Developing countries Conservation of natural resources - Developing countries Recycling industry - Developing countries Environmental policy - Developing countries
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- Sustainable lifestyles, livelihoods and the circular economy / Patrick Schroder, Manisha Anantharaman, Kartika Anggraeni, Tim Foxon and Jeffrey Barber -- Narratives and politics of waste and the circular economy in the global south -- The many circuits of a circular economy / Ashish Chaturvedi, Jai Kumar Gaurav and Pragya Gupta -- The politics of marine plastics pollution / Patrick Schroder and Victoria Chillcott -- Circular economy and inclusion of informal waste pickers : political economy perspectives from India and Brazil / Patricia Noble Gonzales -- The role of women in upcycling initiatives in Jakarta, Indonesia : a case for the circular economy in a developing country / Priliantina Bebasari -- Policy frameworks and green industrial development approaches -- The Argentinean zero waste framework : implementation gaps and over-sight of reusable menstrual management technologies / Jacqueline Gaybor and Henry Chavez -- Assessment of the circular economy transition readiness at a national level : the Colombian case / Claudia Garcia and Steve Cayzer -- Promoting industrial symbiosis in China's industrial parks as a

circular economy strategy: the experience of the Teda eco centre / An Chen, Yuyan Song and Kartika Anggraeni -- Accelerating the transition to a circular economy in africa : case studies from Kenya and South Africa / Peter Desmond and Milcah Asamba -- Livelihoods and traditional circular economy practices: -- Securing nutrition through the revival of circular lifestyles : a case study of endogenous rural communities in Rajasthan / Deepak Sharma and Jayesh Joshi -- Contesting thoughts and attitudes to "sufficiency" : organic farming in an urbanised village in Thailand / Atsushi Watabe -- Conclusion and outlook: circular economy approaches for the sustainable development goals -- Pathways to an inclusive circular economy / Patrick Schroeder, Manisha Anantharaman, Kartika Anggraeni, Tim Foxon -- Index.

Sommario/riassunto

The circular economy is a policy approach and business strategy that aims to improve resource productivity, promote sustainable consumption and production and reduce environmental impacts. This book examines the relevance of the circular economy in the context of developing countries, something which to date is little understood. This volume highlights examples of circular economy practices in developing country contexts in relation to small and medium enterprises (SMEs), informal sector recycling and national policy approaches. It examines a broad range of case studies, including Argentina, Brazil, China, Colombia, India, Indonesia, Kenya, South Africa, and Thailand, and illustrates how the circular economy can be used as a new lens and possible solution to cross-cutting development issues of pollution and waste, employment, health, urbanisation and green industrialisation. In addition to more technical and policy oriented contributions, the book also critically discusses existing narratives and pathways of the circular economy in the global North and South, and how these differ or possibly even conflict with each other. Finally, the book critically examines under what conditions the circular economy will be able to reduce global inequalities and promote human development in the context of the Sustainable Development Goals. Presenting a unique social sciences perspective on the circular economy discourse, this book is relevant to students and scholars studying sustainability in economics, business studies, environmental politics and development studies.
