Sommario/riassunto

In Preparing Students for Life and Work: Policies and Reforms Affecting Higher Education's Principal Mission the editors assemble works by scholars of higher education who address various aspects of the policies and reforms that affect the education and ultimately the lives and work prospects of students. Chapter topics include the social and government policy context of higher education in various countries, including Canada, Mexico, the USA, Japan, Germany, Europe generally and the Bologna process specifically. Aspects of teaching and learning in higher education, including MOOCs, student services, and treatment of international students are also addressed. Finally, how students themselves have had major impacts on higher education in various countries is touched upon in several chapters.
