Sommario/riassunto	After the Restoration, parliamentarians continued to identify with the decisions to oppose and resist crown and established church. This was despite the fact that expressing such views between 1660 and 1688 was to open oneself to charges of sedition or treason. This book uses approaches from the field of memory studies to examine 'seditious memories' in seventeenth-century Britain, asking why people were

prepared to take the risk of voicing them in public. It argues that such activities were more than a manifestation of discontent or radicalism -- they also provided a way of countering experiences of defeat. Besides speech and writing, parliamentarian and republican views are shown to have manifested as misbehaviour during official commemorations of the civil wars and republic. The book also considers how such views were passed on from the generation of men and women who experienced civil war and revolution to their children and grandchildren.
