

1. Record Nr.	UNINA9910793654203321
Autore	Hu Zhengbing
Titolo	Self-learning and adaptive algorithms for business applications : a guide to adaptive neuro-fuzzy systems for fuzzy clustering under uncertainty conditions / / Zhengbing Hu, Yevgeniy V. Bodyanskiy, and Oleksii K. Tyshchenko
Pubbl/distr/stampa	Bingley, UK : , : Emerald Publishing, , 2019
ISBN	1-83867-173-0 1-83867-171-4
Edizione	[First edition.]
Descrizione fisica	1 online resource (117 pages)
Collana	Emerald points
Disciplina	004
Soggetti	Business - Data processing Electronic data processing Fuzzy systems Business & Economics - Research & Development Neural networks & fuzzy systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Prelims -- Introduction -- Review of the problem area -- Adaptive methods of fuzzy clustering -- Kohonen maps and their ensembles for fuzzy clustering tasks -- Simulation results and solutions for practical tasks -- Conclusion -- References.
Sommario/riassunto	In today's data-driven world, more sophisticated algorithms for data processing are in high demand, mainly when the data cannot be handled with the help of traditional techniques. Self-learning and adaptive algorithms are now widely used by such leading giants that as Google, Tesla, Microsoft, and Facebook in their projects and applications. In this guide designed for researchers and students of computer science, readers will find a resource for how to apply methods that work on real-life problems to their challenging applications, and a go-to work that makes fuzzy clustering issues and aspects clear. Including research relevant to those studying cybernetics, applied mathematics, statistics, engineering, and bioinformatics who are working in the areas of machine learning, artificial intelligence,

complex system modeling and analysis, neural networks, and optimization, this is an ideal read for anyone interested in learning more about the fascinating new developments in machine learning.
