Livello bibliografico	Monografia
Nota di contenuto	Step 1. Form a water shortage response team Step 2. Forecast supply in relation to demand Step 3. Balance supply and demand and assess mitigation options Step 4. Establish triggering levels Step 5. Develop a staged demand reduction program
Sommario/riassunto	M60 will help water managers facing water shortages by illustrating how to employ tried-and-true strategies and tactics of drought mitigation, as well as introducing new tools and methods. The manual accomplishes this by providing a step-by-step process to anticipate and respond to water shortages through a structured planning process.
