Sommario/riassunto	This book argues that all truths systems include paradoxes. Paradoxes, such as found in the sciences, philosophy and religion offer themselves as mutually shared partners in a dialogue of arguably incommensurable truths on the basis of their underlying truth. Paradoxes leap beyond the epistemic border of individual truth claims. A dialogue of truths, grounded in paradox, reaches before, and at the same time past singular truths. A paradox-based dialogue of truths elevates the communication of disciplines, such as the sciences and religion, to a meta-discourse level from which differences are not perceived as obstacles for dialogue but as complementary aspects of a deeper and fuller truth in which all truths are grounded.
