Descrizione fisica	1 online resource (xx, 296 pages)
Collana	Westview replica edition
Disciplina	338.9431
Soggetti	Technology and state - Germany (East) Research, Industrial - Germany (East)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages 247-277.) and index.
Sommario/riassunto	Focusing on East Germany's capacity to innovate and diffuse technology, this book sheds light on the technological gap that has developed between the two Germanies. Dr. Bentley compares the sophistication of GDR and FRG technology in different industrial branches, evaluates the strengths and weaknesses of the GDR's research and development system, compares the R&D effort of the two Germanies, and discusses the government policies that affected technological change in GDR industry from 1945 to 1975. He identifies and analyzes hindrances to research, innovation, and diffusion in the fields of planning, organization, economic stimulation, and ideology, and looks at the formation of interest groups. He also compares evidence from the GDR with data from other countries, including the USSR.
