

1. Record Nr.	UNINA9910793778303321
Autore	Campbell Victoria A
Titolo	Top 3 Differentials in Nuclear Medicine : A Case Review // by: Wolin, Ely A.
Pubbl/distr/stampa	New York, New York : , : Thieme Medical Publishers, , 2019
ISBN	1-62623-354-3
Descrizione fisica	1 online resource (xii, 326 pages) : illustrations (some color)
Disciplina	616.0757
Soggetti	Diagnosis, Radioscopic Diagnosis, Differential Nuclear medicine Atlas. Case Reports. Case studies.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Neuro -- Thyroid and parathyroid -- Cardiac -- Lung -- Hepatobiliary -- Gastrointestinal -- Genitourinary -- Bone -- Infection and inflammation -- Fluorine-18 Fluorodeoxyglucose Positron-Emission Tomography -- Tumor (not PET) -- Quality control.
Sommario/riassunto	"Top 3 Differentials in Nuclear Medicine: A Case Review by renowned nuclear radiologist Ely A. Wolin and esteemed contributors is one in a series of radiology case books mirroring the format of the highly acclaimed O'Brien classic, Top 3 Differentials in Radiology: A Case Review. The book is organized into 12 parts, with initial parts covering neuro, thyroid and parathyroid, cardiac, lung, hepatobiliary, gastrointestinal, genitourinary, and bone imaging. Latter parts focus on imaging of various inflammatory processes, infections, and neoplasms. The final part covers the important topic of quality control, which is essential for both American Board of Radiology (ABR) exam review and clinical practice. Each case is formatted as a two-page unit. The left page features clinical images, succinctly captioned findings, and pertinent clinical history. The right page includes the key imaging gamut, differential diagnoses rank-ordered by the "Top 3," additional

diagnostic considerations, and clinical pearls."--Publisher's description.
