Sommario/riassunto	"From Music to Sound is an examination of the six musical histories whose convergence produces the emergence of sound, offering a plural, original history of new music. Both well-known and lesser-known works and composers are analysed in detail, from Debussy to contemporary music in the early 21st century; from rock to electronica; from the sound objects of the earliest musique concrete to current electroacoustic music; from the Poeme electronique of Le Corbusier-Varese-Xenakis to the most recent inter-arts attempts. Covering theory, analysis and aesthetics, this book will be of great interest to scholars, professionals and students of Music, Musicology, Sound Studies and Sonic Arts"--
