1. Record Nr. UNINA9910793960903321

Titolo	Bioremediation : a sustainable approach to preserving earth's water / / [edited by] Sanjay K. Sharma, JECRC University, Jaipur
Pubbl/distr/stampa	Boca Raton, Florida : , : CRC Press, , 2019
ISBN	0-429-95254-6 0-429-95255-4 0-429-48965-X 9780429952548 9780429489655 042948965X
Descrizione fisica	1 online resource (xvi, 264 pages) : illustrations
Disciplina	628.162
Soggetti	Water - Purification - Biological treatment Green chemistry Bioremediation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Green chemistry and its applications in water remediation / S. Atalay, G. Ersoz, and Sanjay K. Sharma -- Share of bioremediation in research journals : a bibliometric study / Hasan Demir and Sanjay K. Sharma -- Biofunctionalized adsorbents for treatment of industrial effluents / P. Banerjee, A. Mukhopadhyay, and P. Das -- Applications of biosorption in heavy metals removal / F. E. Soetaredjo, S. P. Santoso, L Laysandra, K. Foe, and S. Ismadji -- Biodegradation of synthetic dyes in wastewaters / S. Ortiz-Monsalve and M. Gutterres -- The cross-talk between bioremediation and valuation of residues of the olive-oil production chain / Ana Filipa Domingues, Ines Correia Rosa, Ruth Pereira, and Joana Luisa Pereira -- Applications of biosorption in dyes removal / Jacqueline Benvenuti, Santiago Ortiz-Monsalve, Bianca Mella, and Mariliz Gutterres -- Use of bioremeidation in treatment of industrial effluents / A. Gurses and K. Gunes -- Biosorption : a promising technique against dye removal / G. Ersoz and S. Atalay -- Green synthesis of carbonaceous adsorbents and their application for

	removal of polyaromatic hydrocarbons from water / S. R. Barman, A. Mukhopadhyay, and P. Das
Sommario/riassunto	"Bioremediation: A Sustainable Approach to Preserving Earth's Water discusses the latest research in green chemistry practices and principles that are involved in water remediation and the quality improvement of water. The presence of heavy metals, dyes, fluoride, dissolved solids and many other pollutants are responsible for water pollution and poor water quality. The removal of these pollutants in water resources is necessary, yet challenging. Water preservation is of great importance globally and researchers are making significant progress in ensuring this precious commodity is safe and potable. This volume illustrates how bioremediation in particular is a promising green technique globally"--
